Understanding Long COVID: How do we protect our patients from the Unseen Public Health Crisis

In this webinar, we will investigate the symptoms, diagnosis, management strategies, and implications for patient care associated with Long COVID. In addition, there will be an opportunity for interactive Q&A where participants can raise questions and concerns, thereby fostering a dynamic and engaging learning experience.

COVID-19 immunization in high-risk populations: What does evidence from the real-world tell us?

In this webinar, we will discuss the high-risk populations and their unique vulnerabilities to COVID-19. We will analyze the latest real-world data on vaccine efficacy and safety across different high-risk groups, and we will deepen our insights into the challenges faced during the vaccination of these populations and the lessons learned to-date.

Vaccine hesitancy in your clinic: Addressing the difficult COVID-19 questions with your patients

In this webinar, we will review vaccine hesitancy, its implications on public health, and how it is particularly playing out in the context of the COVID-19 pandemic. We will also discuss proven strategies for engaging in respectful, empathetic conversations with hesitant patients, building trust, and promoting informed decision-making.
