

How to Diagnose and Treat ATTR Cardiomyopathy: A Primer for Clinical Cardiologists

Sign up for a session

Tuesday, Nov. 26th 2024

6:00 - 7:00 pm PST

(9:00 - 10:00 pm EST)

Monday, Dec. 2nd 2024

7:00 - 8:00 pm AST

(6:00 - 7:00 pm EST)

Monday, Dec. 2nd 2024

7:30 - 8:30 pm EST

Tuesday, Dec. 3rd 2024

7:00 - 8:00 pm EST

Faculty

Margot Davis
MD, MSc, FRCPC, FCCS

Clinical Associate Professor,
University of British Columbia
Vancouver, BC

Ryan Davey
MD, FRCPC, FACC

Associate Professor,
Division of Cardiology Heart Failure Service,
Schulich School of Medicine & Dentistry,
Western University
London, ON

Moderator

Milan Gupta
MD, FRCPC, FCCS, CPC (HC)

Assistant Professor, Department of Medicine
University of Toronto,
Medical Director,
Collaborative CME and Research Network
Brampton, ON

ATTR cardiomyopathy is an underdiagnosed condition with high morbidity and mortality. With new disease-modifying treatments available, the prognosis for patients with ATTR cardiomyopathy can be substantially improved. This program will guide cardiologists in how to suspect and confirm diagnosis, which heart failure therapies to avoid using, and how to initiate disease-modifying therapies and obtain drug reimbursement.

Learning Objectives

- Review a practical diagnostic approach to ATTR-cardiomyopathy
- Discuss which heart failure therapies to use and which to avoid
- Facilitate obtaining coverage and initiating disease-modifying treatments

Target Audience: Cardiologists and Internists
